DETAILED ACTION

1. Applicant's arguments filed December 1, 2005, have been fully considered.
2. Claims 16-22 and 38-45 are pending and have been examined. Claims 1-15 and 23-37 have been cancelled.

Allowable Subject Matter

3. Claims 16-22 and 38-45 would be allowable.
4. The following is an examiner's statement of reasons for allowance: the prior art of record, namely Yach et al. (US Patent Number: 5,454,114 hereinafter "Yach") and Green (US Patent Number: 4,769,765), does not expressly disclose the claimed steps and processing. More specifically, even though Yach teaches the elements (CPU, integrated circuit, etc., columns 3-4) claimed in amended claims 16-22 and 38-45, Yach does not expressly disclose the steps of a CPU performing an initialization sequence and detecting a state of a timer (activated or not), and depending on the state performing another processing sequence or disabling the integrated circuit. Green simply provides the teachings for disabling a device according to a timer.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
6. **Claim 16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.**

Art Unit: 2136

7. Claims 17-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Claim Rejections - 35 USC § 112

9. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

10. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16 recites the limitation "performing the processing sequence". There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2136
